Recycling Reference Guide

Membrane Requirements

- Membrane must be flexible and free of contaminants like adhesive, asphalt, facer, fasteners, plates, stones, and mold
- Cut and remove seam overlaps, tapes, flashings and patches
- Fold or roll membrane so it fits squarely on a standard 48" x 40" wooden pallet. Stack membrane to 3' high.
- Secure membrane to the pallet

Insulation Requirements

- Insulation must be full, intact sheets that are dry and free of adhesive, membrane or mold.
- No wet or broken boards
- Stack on dunnage or pallets to 4' high
- Secure insulation by taping the stack together

Non-conforming loads are subject to rejection and surcharge at current disposal rates.

Cylinder and Drum Requirements

- All containers must be empty and placed on a pallet.
- ALL CYLINDERS MUST BE DEPRESSURIZED PRIOR TO SHIPMENT. Cylinders that do not have the friable disk or knockout valve punctured will not be accepted.
- Stretch wrap the pallet
- ONLY standard (#40) cylinders of CAV-GRIP III, CAV-GRIP PVC, and Flexible DASH Dual Tank or small (#20) cylinders of CAV-PRIME will be accepted at the disposal facility.
- Shipments must contain at least the required minimum quantity or a $100 fee will be assessed. There is no maximum cap limit for the number of cylinders that can be shipped
- Call the nearest CleanEarth recycling location and arrange shipping

Clean Earth Locations

Address	City/State/Zip	Phone Number
1689 Shar-Cal Road	Calvert City, KY 42029	270-605-2105
1750 Morgantown Industrial Park	Morgantown, WV 26501	304-292-0659
402 Webster Chapel Road	Glencoe, AL 35905	800-739-9156
30677 Huntwood Avenue	Hayward, CA 94544	510-429-1129
1733 Morgan Road	Modesto, CA 95358	510-429-1129
4132 Pompano Road	Charlotte, NC 28216	704-395-9559

- Large (#85) cylinders of CAV-GRIP III should be recycled by following the procedure described on the cylinder sticker.
